TECHNICAL SKILLS

Core: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems

Programming Languages: C, Java, Python, JavaScript

Frontend & Backend: NodeJS, ExpressJS, ReactJS, NextJS, REST API, Tailwind CSS, FastAPI

Tools & Platforms: Git, GitHub, Docker, Google Colab, AWS, Postman, CI/CD, Jenkins

Databases: MySQL, MongoDB, PostgreSQL

EXPERIENCE

Software Developer Intern

January 2026 – April 2026

Allianz Cloud Pvt. Ltd.

Vadodara, Gujarat

- Developed a fullstack Domain Vulnerability Scanner using Next.js, React.js, and Python to identify security vulnerabilities, misconfigurations, and domain-related risks.
- Designed and integrated RESTful APIs using FastAPI for real time domain analysis, scan execution, and structured vulnerability reporting to the frontend.
- Implemented background scan processing, WebSocket based live updates, asynchronous request handling, and Docker based containerization for backend services and scanning workflows.
- Built responsive and dynamic frontend interfaces to visualize scan summaries, vulnerability reports, and domain insights with an interactive user experience.
- Developed authentication, organization/member management, invitation workflows, and role based access control for secure multi-user collaboration.
- Worked on backend-frontend integration, API debugging, and workflow optimization to ensure reliable communication and consistent application performance.

Python Developer Intern

November 2025 – January 2026

Infosys Springboard

Remote

- Developed SkillGapAI, an AI-powered resume and job description analysis platform using Python, BERT, and NLP techniques to identify skill gaps and generate personalized upskilling recommendations.
- Implemented resume parsing, text preprocessing, semantic similarity analysis, and recommendation workflows to improve matching accuracy between candidate profiles and job requirements.
- Contributed to feature design, model integration, debugging, and iterative product enhancements during a 2 month remote agile sprint cycle.

PROJECTS

Nous

GitHub

Python, C#, Socket Programming, MySQL, Avalonia UI, SSL/TLS, Gemini AI, RAG, Flask

- An AI desktop app to run Windows CMD commands for remote execution using RAG and LLMs.
- Secured client-server communication over SSL/TLS with automated hourly IP + hash-based re-authentication.

Get Me A Chai

Live | GitHub

NextJS, Tailwind CSS, MongoDB (Mongoose), NextAuthJS, API Routes, Razorpay API

- Developed a crowdfunding platform in NextJS with MongoDB backed creator dashboards.
- Integrated Razorpay with test mode, handling webhook callbacks for payment verification.
- Added Google/GitHub authentication with NextAuth and deployed the production build to Vercel.

Linkium

Live | GitHub

NextJS, MongoDB, Tailwind CSS, JWT, Bcrypt, Nodemailer, API Routes

- A "link in bio" app that lets users sign up, manage multiple links, and share a public profile.
- Implemented JWT based auth with token expiry, bcrypt password hashing, and Nodemailer driven OTP reset flow.

EDUCATION

Parul Institute of Engineering & Technology

July 2022 – April 2026

Computer Science & Engineering, Bachelor of Technology

Vadodara, Gujarat

CGPA: 8.48

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – **AWS**
- Google - Ask Questions to Make Data-Driven Decisions – **Coursera**
- Database and SQL – **Infosys Springboard**
- Computer Networks and Internet Protocol – **NPTEL**
